

# Pocatello High School

In 2008 the City of Pocatello renovated this parking area, adding new pavement, permeable pavers, and drought tolerant landscaping as a demonstration project.

Under a growing tree canopy are native penstemons, blue avena grass, Idaho fescue grass, roses, sedums, creeping Oregon grape, flax, sumacs and more. The planted parking strips demonstrate how masses of native plants can be used to bring color and texture to parking areas.
